Airport Packages

Depending on your membership level, you may download airport scenery packages containing more than 400 airports. Some of these airports are original with added unique characteristics to make the approaches challenging and fun. The rest of the airports were developed utilizing our own customized and personalized panels that are perfect for ILS and non-precision approaches. As you know, we fly almost every night, and can be found on Game Spy under the name of "It's tougher in Alaska."

We welcome you to join us as a member and fly with us and become familiar with the art of flying. As you improve your game and learn-the-ropes, your membership status may improve and you will eventually access all of our airports and sceneries.
